TO KNOW IT'S UNIT

1. Tank and Coffee Filter Holder Cover
2. Filter holder and water tank (behind)
3. Anti-Drip System
4. Glass jug
5. Handle and lid of the jug
6. Heating plate
7. Timer
8. (on the side)
Water level display window

FIRST USE

Before first use, remove the device and all accessories and being careful with sharp accessories.

- Clean the apparatus according to the instructions in "Cleaning" paragraph.
- Place the machine on a suitable flat, stable surface.

PREPARATION OF THE APPLIANCE

To ensure excellent coffee, you must first rinse the machine with hot water as follows:

1. Open the lid
2. Pour water into the tank. (Without exceeding the maximum level !
Without putting coffee powder in the filter)

3. Close the tank cover.
3. Place the carafe on the hot plate.
4. Connect the unit, "12: 00" is displayed.

When the unit is connected, the LCD shows "12:00" (if the time is not set) or shows the previously selected time.

Press the "M / A" (On / Off) button the red light comes on and the coffee maker starts to heat up.

1. When the water flows, it passes through the filter and fills the coffee jug.
2. After the water has flowed over the coffee, either let the coffee warm, or press the Start / Stop button again to turn off the coffee maker.

Note: When the coffee has passed, the appliance will keep the coffee warm by using the integrated heating plate. It will turn off automatically after 30 minutes.

If it is not necessary to keep the coffee warm, press the "ON / OFF" button and the appliance will stop working.

For a better flavour, empty, and clean the filter after each use

Carefully remove the filter when it is hot.

LOCATION OF FUNCTIONS

1. Hour setting button
2. Minutes setting button
3. LCD screen
4. Programming key
5. On / Off Button

SETTING THE CLOCK

1. When connecting the unit, the LCD screen shows "12:00".
2. Press once the "PROG" key. The LCD screen shows "Clock" and the two dots in the middle of the display flash.
3. To Set to local time :

- ↳ Press the "Time" key to set the hour.
- ↳ Press the "Min" key to set the minutes.

Note: By pressing the button for a longer time, the hours or minutes scroll faster.

4. After setting the time, press the "PROG" button again to confirm the setting. The clock stops blinking and displays the time.

Notes: If the adjustment is not the correct one, repeat the operation starting from N° 2.

The time setting is not required to operate the unit.

USE

- Unroll the power cord completely.
- Check that the tension in force in the country where you are corresponds to that indicated on the apparatus.
- Connect the apparatus in a correct socket-outlet, (and connected to the ground if the unit is Class I), to avoid any danger. Disconnect the power source cable before any operation of cleaning of maintenance and accessories assembly.
- Stand the appliance on a table or flat & stable surface.
- The item must not be left unattended when it is connected to main supply.
- The item is not to be used, if it has been dropped or if there are visible signs of damage or if it is leaking.
- Never modify the appliance in anyway.

ADJUSTING THE AUTOMATIC PROGRAMMING

This appliance has a programming function after the coffee has been prepared.

1. Press the "PROG" button to set the unit. The display shows "Clock", and the two light dots flash.
2. Press the "PROG" button again.

The LCD screen shows "Timer"

..... THIS IS THE PROGRAMMING MODE

3. To set the time for the coffee machine to start automatically, press the "Time" key to set hour and press Min. To set the minutes.

4. After setting the program, press the "PROG" key to confirm the command. The green LED lights up.

The green light will remain lit until the coffee maker will turn on.

When the set time is reached, the green light goes off and the red light comes on, meaning that the coffee maker has started.

You have 8 seconds to cancel the start by pressing one of the keys. If no button is pressed, the coffee will pass through the filter into the carafe.

5. After the coffee has flowed, the jug will hold the hot coffee for 30 minutes. After this time it will turn off automatically.

NOTE: To re-schedule another time, press twice on "clock" to display "timer" again, the indicator lights up green and you can :

Either reset the unit to a new starting time.

Either press "prog" again to cancel programming.

To re-program the start-up of the coffee maker, refer to the paragraph:

AUTOMATIC PROGRAMMING.

USING THE COFFEE MAKER WITHOUT PROGRAMMING

1. Open the tank / filter cover.

2. Fill the water tank with clear water to the required number of cups of coffee.

3. Place a paper filter (or permanent filter not included) in the holder filter.

4. Place the coffee powder in the filter.

5. Close the lid.

6. Press the "M / A" button to start the coffee maker.

7. After the coffee has flowed, the jug will hold the hot coffee for 40 minutes.

After this time it will turn off automatically.

Note: If it is not necessary to keep the coffee warm, press "M / A" again and the appliance will stop working.

CLEANING AND MAINTENANCE

Before cleaning, always switch off the appliance, disconnect the apparatus and let it cool.

Clean the outside of the apparatus with a sponge or slightly wet linen.

The parts (removable) in contact with food like plate, bowl, forks, Spatula etc. can be washed in hot water with sponge and soft detergent or put in the dishwasher.

Never plunge the apparatus in water or all other liquid !

Do not use abrasive cleaners, gritting, or metal brush or another cutting object.

If the area of use is very "limestone", it is strongly advised to get rid of the limestone every two months.

To do this :

1. Place the empty carafe on the hot plate.
2. Mix three cups of alcohol vinegar and nine cups of water, and pour everything into the tank.
3. Turn on the coffee maker for one to two minutes. Then, Turn off and wait for 30 minutes.
4. Switch on the coffee maker so that the water / vinegar mixture flows out, rinse & clean the carafe.
5. Operate the coffee-maker twice, using only clear water. (Change the water between the 2 interventions)

The appliance must never be soaked in water or other liquid.

STORAGE

- Ensure the unit is completely cool and dry.
- Do not wrap the cord around the appliance, as this will cause damage.
- Keep the appliance in a cool, dry place.

GUARANTEE

Before being delivered, all our products are subjected to a rigorous control. This apparatus is guaranteed 24 months starting from the date of purchase by the consumer.

The documents in proof of guarantee are :

- The invoice and
- The filled and stamped warrantee plate (located on side or bottom of the gift box). Without these documents in proof, no free replacement, nor no free repair, can be carried out.

During the warranty period, we deal for free, the defects of the apparatus or the accessories, rising from a defect of materials or manufacture by repair or, replacement. The services within the framework of the guarantee do not involve any extension of the warranty period and does not give right to a new guarantee! In the event of recourse to the guarantee, bring back the complete apparatus to your retailer, in its original packing, accompanied by the proofs of purchase.

The breakage of parts out of glass or plastic is, in all the cases, not warranted. Defects on the accessories or the wearing parts (for example: coals of engines, hooks, drive belts, remote control of replacement, teeth brushes of replacement, webs etc) as well as cleaning, maintenance or it replacement of wearing parts are not guaranteed and are thus to pay!

In the event of foreign intervention, the guarantee becomes null and void.

After flow of the warranty period, repairs can be carried out, against payment, by a specialized trade or a repair service.

SPECIFICATIONS

Power supply 220-240V~ 50Hz
Power 650 W
Norm Class I

Made in PRC

The characteristics can change without preliminary preventing

This unit is equipped with an electrical outlet with earth and must be earthed in an according plug.

Note : In the event of question concerning the earth or electric connection, please consult a qualified personnel.

In the event of short-circuit, earthing reduces the risk of electric shock while making possible the current to be evacuated by the wire of ground.

CAUTION: In order to minimize the risks of electric shock, In the event of breakdown, not to open the case but to call upon a qualified technician for repairs.

This device complies with EC directives, it was controlled according to all current European directives, applicable such as: electromagnetic compatibility (EMC) and low voltage (LVD).

This device has been designed and manufactured in compliance with the latest regulations and technical requirements for safety.
